PRODUCT DEVELOPMENT · DIEUX SKIN

Forever Face Mask

A reusable silicone mask that helps the hydrating skincare you already own work harder.

REUSABLE | 3 SIZES | MEDICAL-GRADE

Sarah Lahlali · 2026 · Concept, not affiliated with Dieux

CONTENTS

What's inside

A record of the product decisions behind a reusable silicone face mask for Dieux, from problem to launch.

01	**Context** Why Dieux, and the Eye Mask that built the brand	03
02	**Problem and insight** Sheet-mask waste and the occlusion insight	04
03	**Opportunity** Cost per use and the whitespace I found	06
04	**The product** Requirements, concept, design decision, prototype	08
05	**Proof** Science, testing plan and proposed claims	12
06	**Economics and risk** Cost model, pricing, risks, kill criteria	15
07	**Launch and learning** Roadmap, targets and what I learned	19
A	**Appendix** Supporting research, specs and packaging	22

01 · CONTEXT

The Forever Eye Mask built the brand

<1 week to sell a month of launch stock in 2020	**642** Sephora reviews as of 2026, praised for hydration and reuse
1 year of daily use in Dieux's testing before the logo faded	**2.6x** published markup: $9.52 cost, $25 price

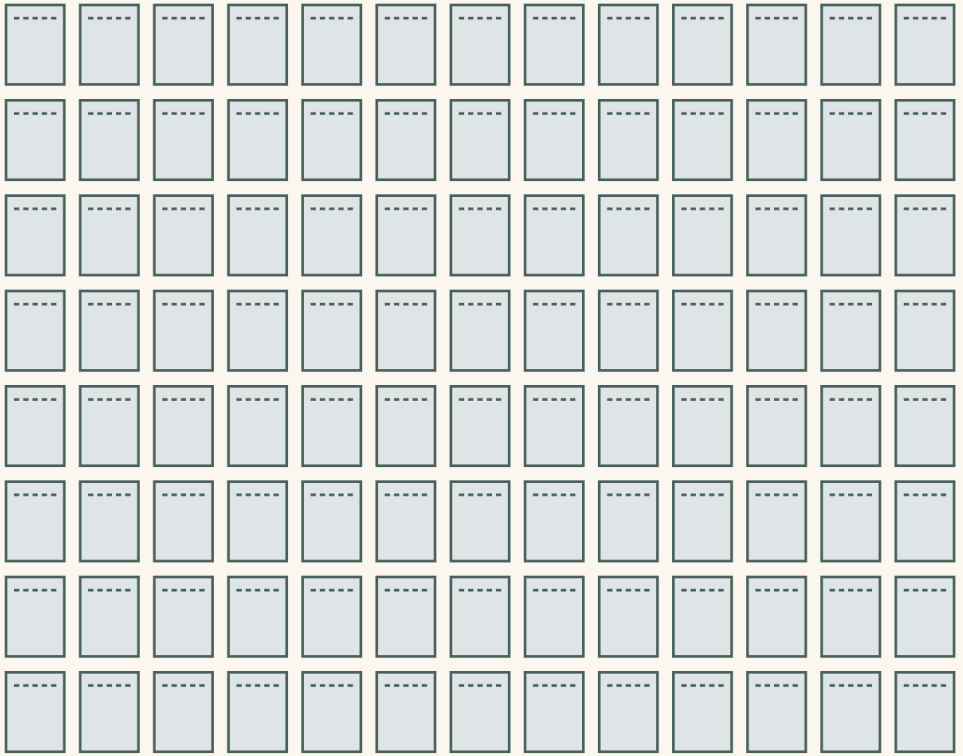

Image: @dieuxskin · Sources: NYLON, Sephora, Dieux

02 · PROBLEM

A loved ritual that leaves waste behind

WASTE	Mask, liner and a foil pouch that can't be recycled at scale
FIT	One size for every face; slips, drips and dries out
COST	$2 to $10 each, for a single-use dose of essence

104 pouches a year for someone who masks twice a week

02 · INSIGHT

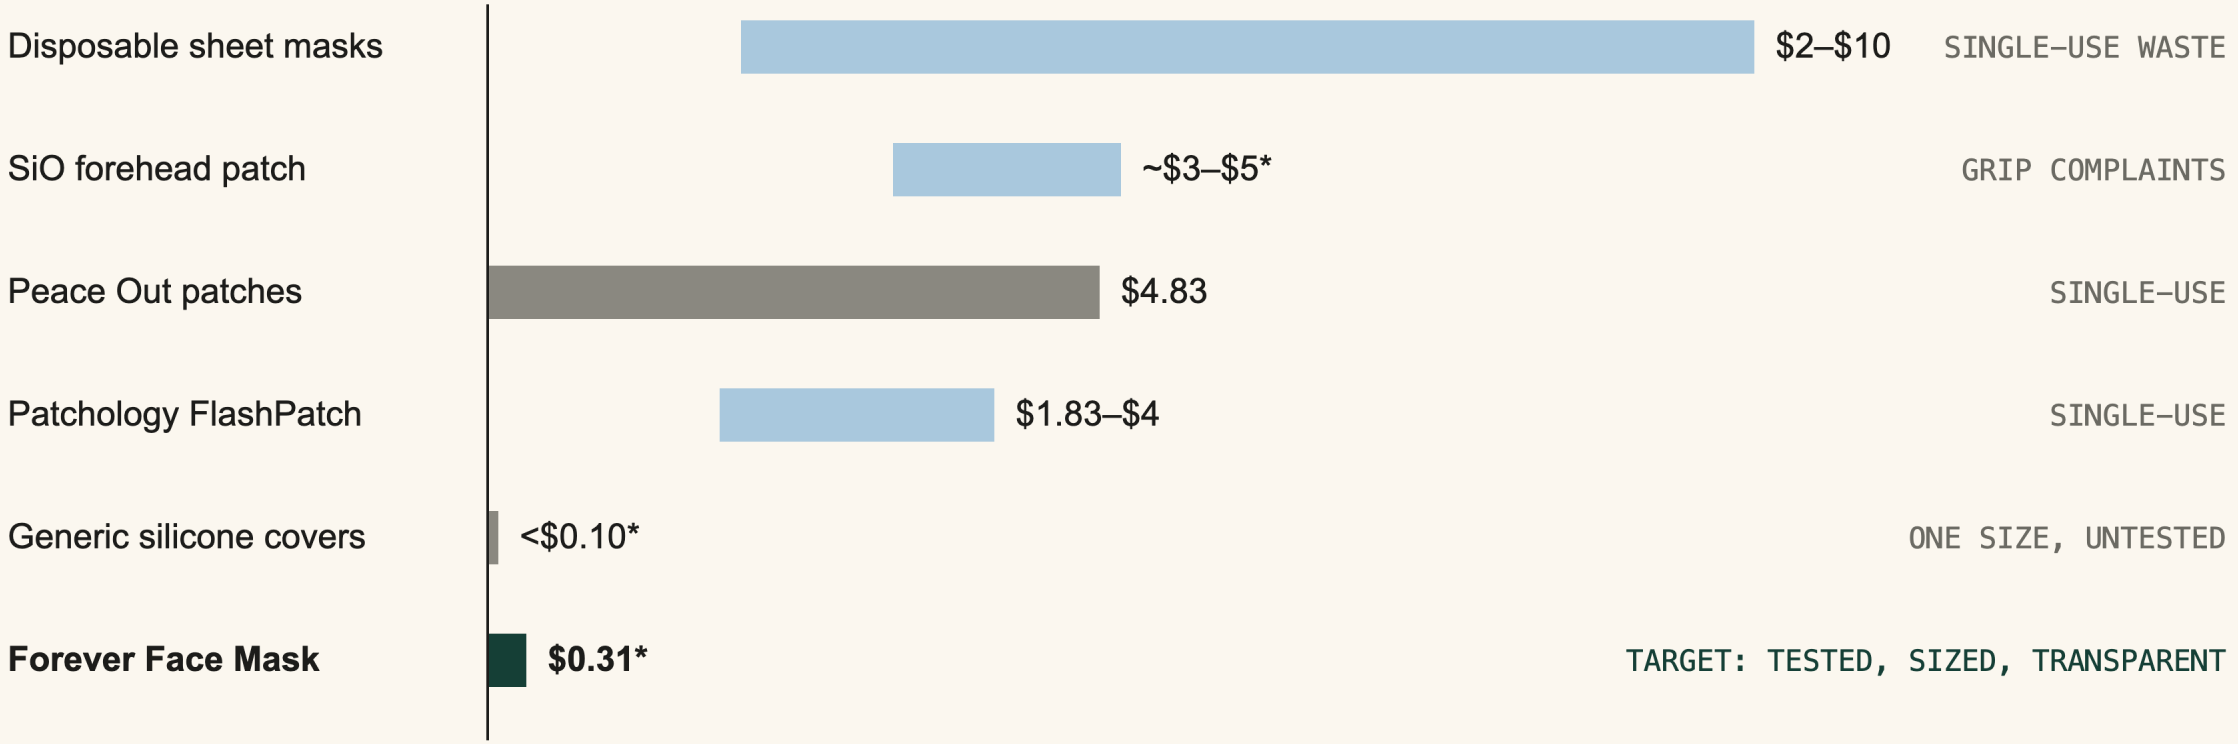

Much of a sheet mask's hydrating effect comes from occlusion: a layer that slows water loss from the skin.

> POSITIONING
>
> Forever Face Mask keeps the serum or moisturizer you already own on your skin, so you can skip single-use sheet masks without paying for a miracle.

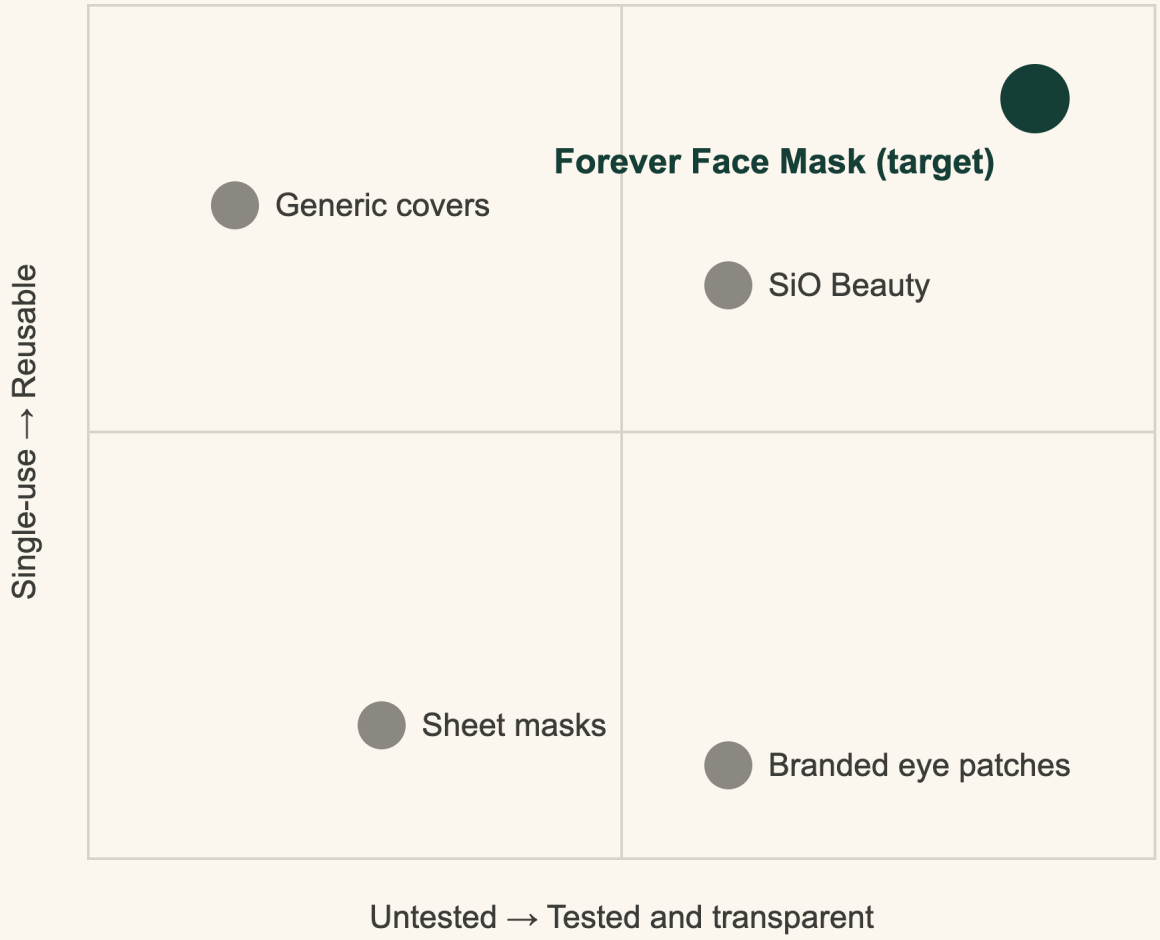

Sources: Zhai & Maibach (2001, 2002); Indian J. Dermatol. Venereol. Leprol.

03 · OPPORTUNITY

What each use really costs

*Estimates: SiO at $32 for 6–10 uses (reviews vs. brand claim); covers at ~100 uses; Forever Face if it lasts a year at 3 uses a week

Positioning map is the author's assessment based on the competitor research

03 · OPPORTUNITY

The whitespace I found: tested + sized + transparent

In my competitive scan, I did not find a sized, strapless silicone mask made to go over your own skincare, with tested materials, published costs and third-party sustainability data.

Dieux won the eye-mask category the same way: honesty over hype.

04 · PRODUCT REQUIREMENTS

Product requirements brief

CONSUMER PROBLEM

Masking fans love the ritual but throw away a pouch every use, and one-size sheets slip and dry out.

JOB TO BE DONE

"When I want a masking ritual, help me get more out of the hydrating skincare I already own, without creating single-use waste."

MUST-HAVES

- ✓ Medical-grade, skin-safe silicone
- ✓ Fits 80%+ of faces in 3 sizes
- ✓ Stays put 15 min, lying back
- ✓ Eye, nose and mouth openings
- ✓ Eye Mask fits underneath
- ✓ Washable; lasts a year or more
- ✓ Plastic-free, recycled packaging

NON-GOALS

- ⚠ No formula or actives included
- ⚠ No wrinkle, lifting or scar claims
- ⚠ No overnight wear
- ⚠ No straps or ear loops

SUCCESS THRESHOLDS · PROPOSED

FIT	SAFETY	RESULT	ECONOMICS	PLANET
80%+ find a size that stays put	Zero sensitization in patch tests	Significant hydration gain vs. product alone	Landed cost about $17 or less at $48	Carbon break-even published

04 · PRODUCT CONCEPT

One mask, three sizes

SHAPE	A single piece covering forehead, cheeks and chin
FIT	Small, medium and large, chosen with a printable fit template
COMFORT	Large openings for the eyes, nose and mouth
EYES	Eye openings sized so the Forever Eye Mask fits underneath

04 · DESIGN DECISION

Why one piece beat a modular set

MEASURED AGAINST	MODULAR SET (FIRST IDEA)	ONE-PIECE MASK (CHOSEN)
Conscious Consumption	Four parts sold separately invite more purchases	One thing to buy, use and keep
Fewer, better materials	Four molds, small parts to lose	One shape per size, one simple tray
Ending guesswork	Fits more faces by design	Three sizes plus a printable fit template
Results Over Miracles	Clever system, harder to explain	One simple tool that does one thing

TRADE-OFFS

More silicone per mask, a full face can feel warmer, and you can't treat just one area. The fit study tests all three sizes before production molds are ordered.

04 · PROTOTYPE

The Forever Face Mask, in its tin

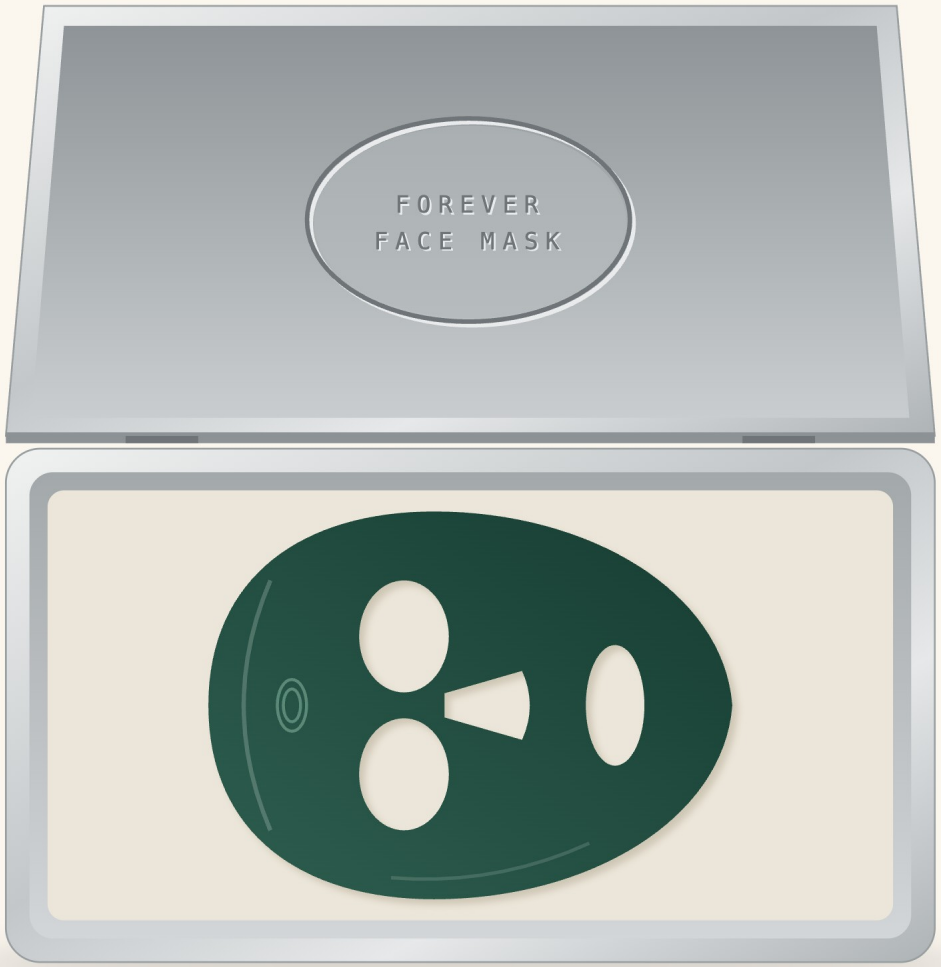

01 **Recycled aluminum tin**
About 215 × 165 × 15 mm, built to be kept

02 **Embossed lid**
Pressed oval, with room for the official logo

03 **Molded-pulp tray**
Shaped to the mask; no plastic liner

04 **One-piece silicone mask**
Size M shown; openings for eyes, nose and mouth

05 **Raised halo emblem**
Molded in at the forehead; no ink to fade

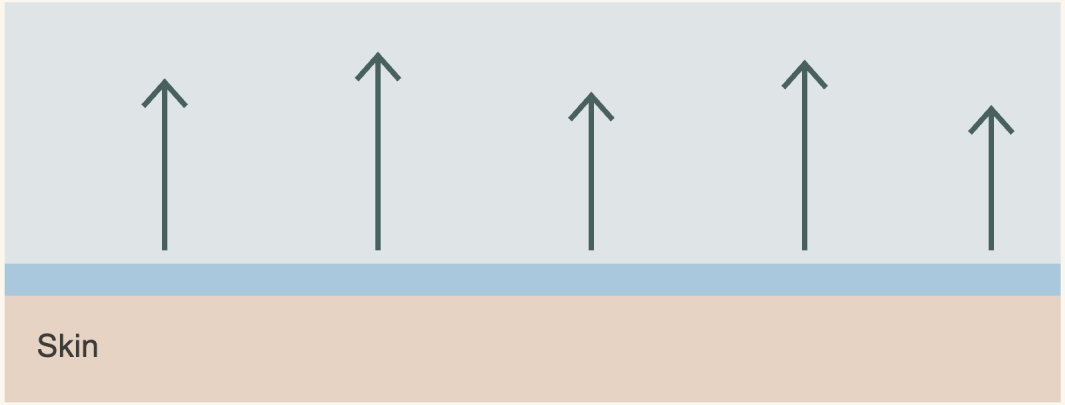

Concept render · Dieux logo to be placed on the lid from official artwork

05 · SCIENCE FOUNDATION

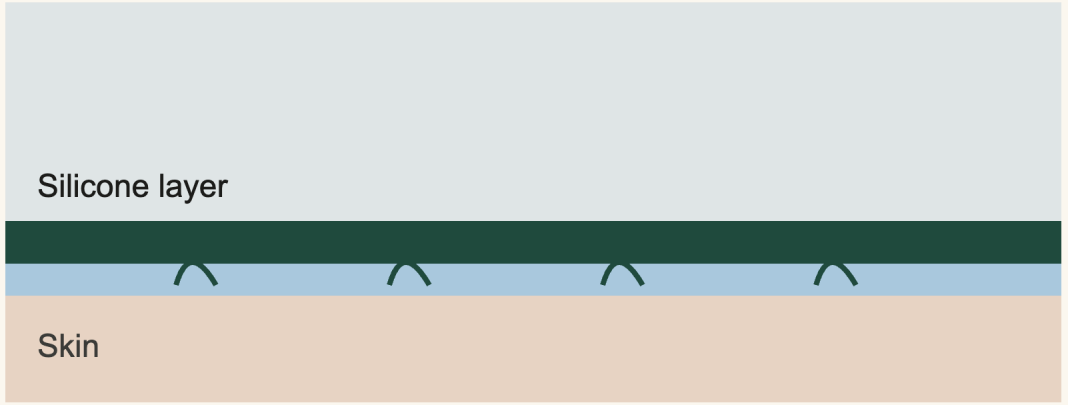

How occlusion works

WITHOUT A MASK

Water escapes from the serum layer

WITH THE FOREVER FACE MASK

Water stays at the skin's surface

⚠ **Not every ingredient** absorbs better; it depends on the formula

⚠ **Longer wear isn't better:** prolonged occlusion can weaken the barrier

⚠ **Silicone isn't special:** a hydrating gel-cream occludes about as well

Sources: Zhai & Maibach (2001, 2002); Indian J. Dermatol. Venereol. Leprol.; Mustoe; Hoeksema et al., Burns (2013)

05 · PROPOSED TESTING PLAN

Proof before any claim

Study	Design	Go / no-go gate
Safety	ISO 10993 tests on finished masks, plus a patch test on about 50 people	No sensitization or irritation
Hydration	Split-face, about 30 people: mask over moisturizer on one side only, 15 minutes	Significant hydration gain vs. product alone; report honestly if it fades by 1–4 hours
Fit and grip	About 40 diverse faces across all three sizes, sitting up and lying back	At least 80% find a size that fits and stays put for 15 minutes
Home use	About 100 people, 3 times a week for 28 days	Perception claims only, labeled with sample size and timeframe
Durability	365+ lab wash cycles plus real-world wear	No tears; grip and emblem hold up

Hydration measured with a Corneometer; water loss with a Tewameter, at baseline, right after, +1 hour and +4 hours

05 · PROPOSED CLAIMS

Claim strategy shapes the regulatory path

The FDA classifies a product by its intended use. Silicone sheeting sold for scars is a Class I medical device, so the wording matters as much as the material.

Proposed claims

- ✓ Keeps your skincare from evaporating
- ✓ Boosts hydration (after the study)
- ✓ Reusable silicone (after ISO 10993 skin-contact testing)

Claims we avoid

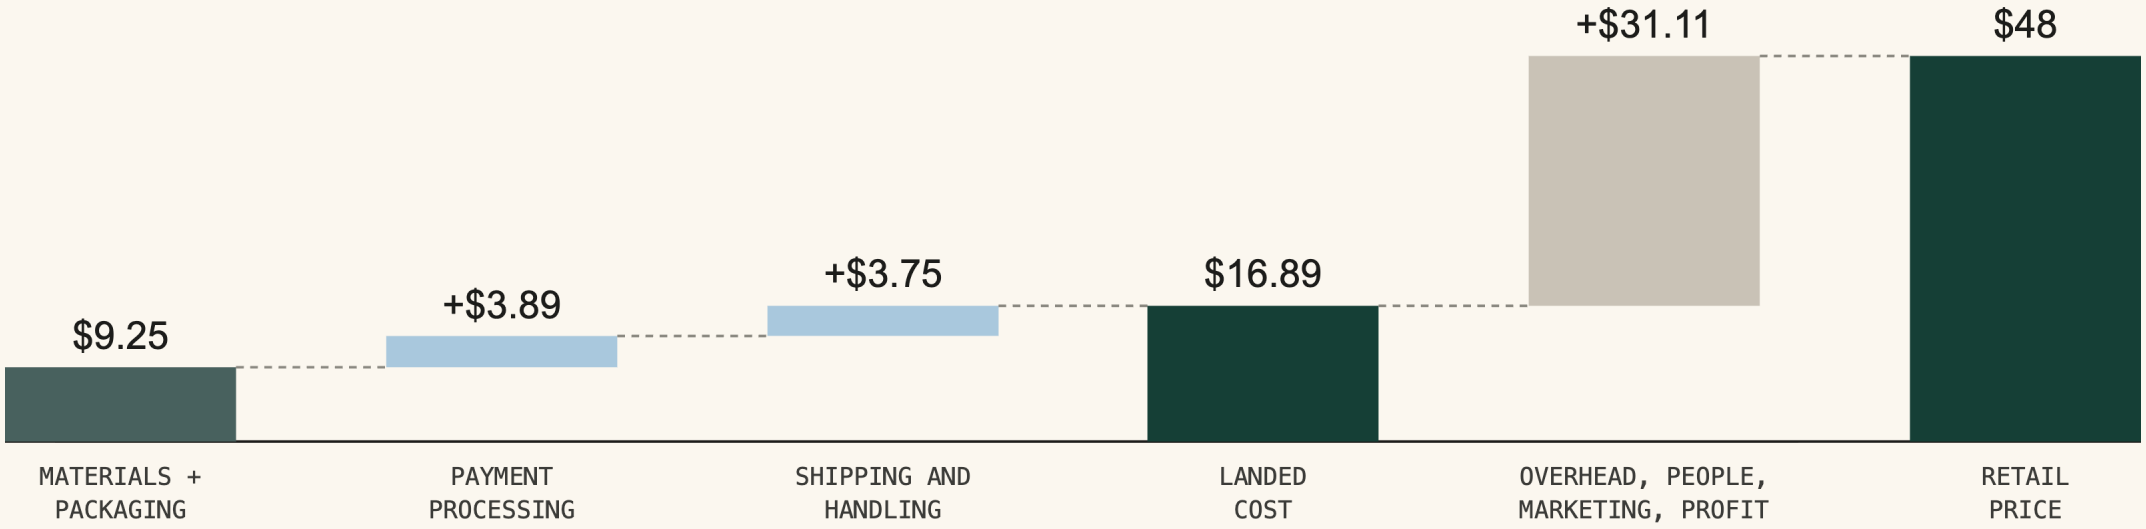

- ⚠ Reduces wrinkles, lifts or sculpts
- ⚠ Treats scars or stimulates collagen
- ⚠ Boosts absorption of any product

Sources: FDA, "Is It a Cosmetic, a Drug, or Both?"; 21 CFR 878.4025. EU requirements still need review by regulatory counsel.

06 · ILLUSTRATIVE COST MODEL

How $48 is built up

ILLUSTRATIVE MODEL · NOT SUPPLIER QUOTED

FACE MASK · HYPOTHESIS

$16.89 landed → $48 · 2.8x

EYE MASK · KNOWN (PUBLISHED)

$9.52 landed → $25 · 2.6x

INSIDE THE $9.25 · ESTIMATE

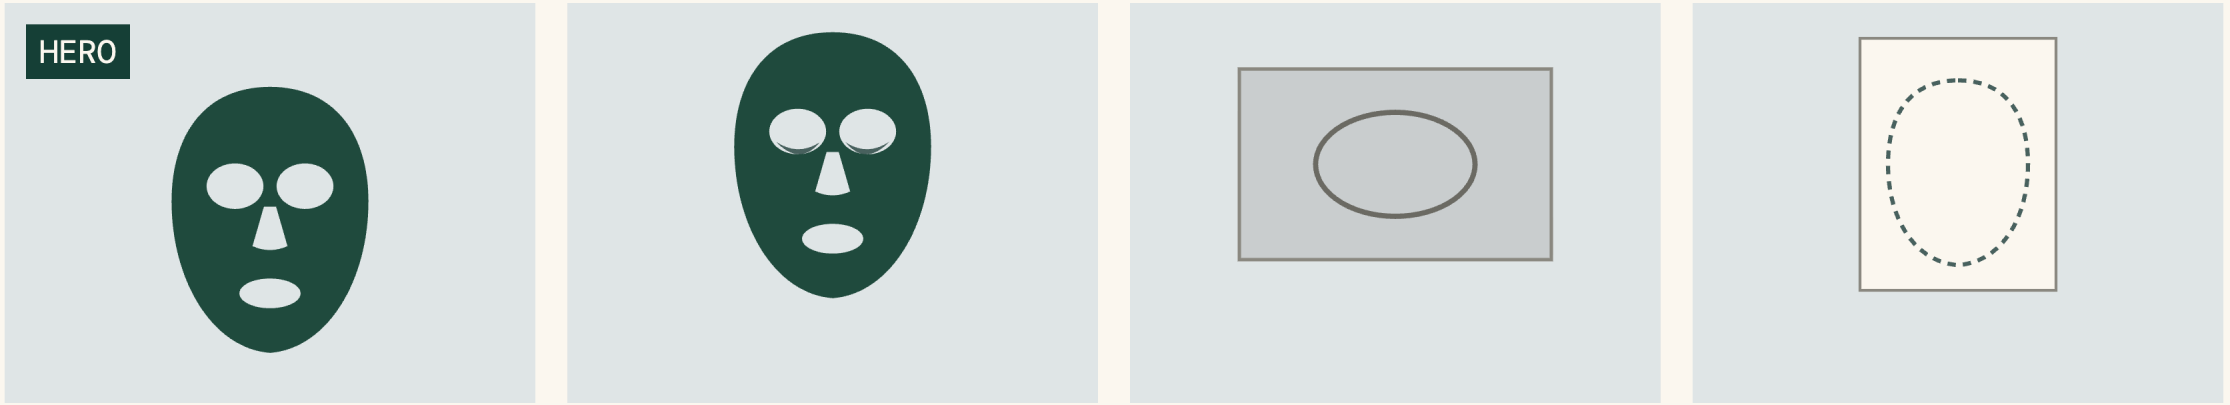

$4.00 silicone · $2.75 tin and insert · $2.50 testing, plus 3 molds spread over a first run of 50,000

Payment processing at 8.1% of price, matching Dieux's published Eye Mask ratio. A smaller first run would raise the mold cost per mask.

06 · PROPOSED PRICING

One mask, one price, every size

HERO

Forever Face Mask

SMALL · MEDIUM · LARGE

$48

Face + Eye Set

FACE MASK + EYE MASK

$68

Replacement Tin

KEEP YOUR MASK

$8

Fit Template

PRINT, MEASURE, PICK

Free

About **$0.31 per use** at three uses a week for a year, vs. $2 to $10 per sheet mask.

06 · RISKS

What could go wrong, and the plan for it

RISK	LIKELIHOOD	MITIGATION
Mask slips or doesn't fit	High	Three sizes, fit template, grip testing, honest "best lying back" message
Cheap copies undercut the price	High	Lead with testing, transparency and take-back
Creators drift into wrinkle or scar claims	Medium	Banned-claims brief and legal review
Irritation from masking over actives	Medium	Clear warnings, education videos, pairing guidance
Sustainability pushback on silicone and metal	Medium	Publish carbon data, lighter insert, take-back
Unsold stock in the wrong sizes	Medium	Pre-orders and fit-template data set the size mix

06 · KILL CRITERIA

When I would stop the project

AREA	STOP IF…	CHECKED AT
Fit	Fewer than 70% of the panel find a size that stays put after one redesign	Q1 2027 fit study
Results	No significant hydration gain compared with the product alone	Q1 2027 hydration study
Safety	Any sensitization in patch testing	Q1 2027 safety tests
Economics	Landed cost above about $20 at a $48 price, or molds far over budget, after renegotiating	Q1 2027 supplier quotes
Sustainability	Carbon break-even beyond about 50 uses, or no viable take-back partner	Q2 2027 Bluebird analysis
Demand	Fewer than 25% of surveyed Eye Mask owners say they're likely to buy	Q4 2026 owner survey

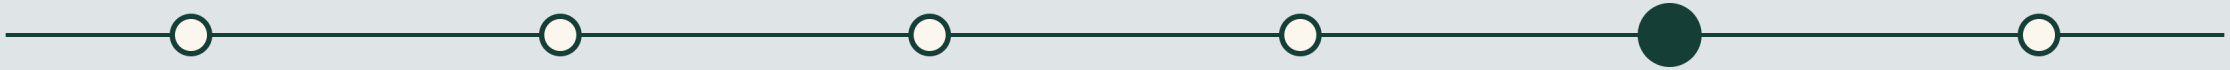

DECISION RULES · PROPOSED

FIT PANEL	80%+ fit: proceed	70–79%: redesign and retest	Under 70% after redesign: stop
LANDED COST	About $17 or less: proceed	$17–$20: renegotiate or simplify packaging	Above $20: stop

Thresholds are proposed and would be agreed with the team before testing starts

07 · PROPOSED ROADMAP

From research to a holiday 2027 launch

Q4 2026

Research

Survey, interviews, 3D face scans, first prototypes

Q1 2027

Fit study

Fit and hydration studies on prototypes; design freeze; safety tests

Q2 2027

Tooling

Production molds, once Q1 gates pass; carbon analysis

Q3 2027

Pilot

Claims locked, pilot run, creator seeding

Q4 2027

Launch

Owner early access, then Dieux.com and Sephora

2028

Grow

Collaboration edition, take-back report, EU review

KEY DEPENDENCY

Production molds are only ordered after the fit and hydration studies pass in Q1 2027.

Timeline is an estimate starting October 2026; Sephora lead times could push launch into 2028

07 · PROPOSED SUCCESS METRICS

Year-one targets, by area

CUSTOMER

10%+

of Eye Mask buyers add the Face Mask within 12 months

4.4+

average rating on Dieux.com and Sephora

PRODUCT AND QUALITY

<15%

of reviews mention slipping or poor fit

<1

skin-reaction report per 10,000 units sold

COMMERCIAL

<5%

return rate on Dieux.com

8 wk

Sephora sell-through at or above category benchmark, set with Dieux's retail data

SUSTAINABILITY

5%+

of early buyers join take-back by end of year two

15–30

uses to carbon break-even, confirmed by Bluebird

All targets are proposed by the author and would be validated with Dieux's real benchmarks

07 · REFLECTION

What the research changed

Fit became the central design problem, a modular set gave way to one sized mask that better fits "buy less," and the price dropped from up to $58 to $48 to stay close to Dieux's published markups.

The weakest evidence is market size and the lack of public fit data for silicone face masks; primary research comes first.

NEXT STEPS

01 Survey owners and run 20 prototype fit interviews

02 Get molding quotes from at least three certified medical silicone molders

03 Commission Bluebird to model the face set's footprint

04 Draft the claims list with regulatory counsel

APPENDIX

Supporting detail

Research and specs behind the decisions in the main deck.

- Brand background and mission
- Market trends
- Hypothesized early adopters
- Design specs
- How to use it
- Packaging and sustainability
- Proposed launch plan

APPENDIX · BRAND BACKGROUND

Dieux at a glance

Mission: industry accountability, ending leaps of faith and guesswork in beauty. **Pillars:** Results Over Miracles · Radical Transparency · Clinical Rigor · Conscious Consumption

2020

Founded by Charlotte Palermino, Joyce de Lemos and Marta Freedman

In-house

Brooklyn lab, so formulas can be iterated many times

714

Sephora stores at its 2024 launch, its first wholesale partner

2024

New CEO Ryan Scott (ex-Tatcha) is reviewing the product pipeline

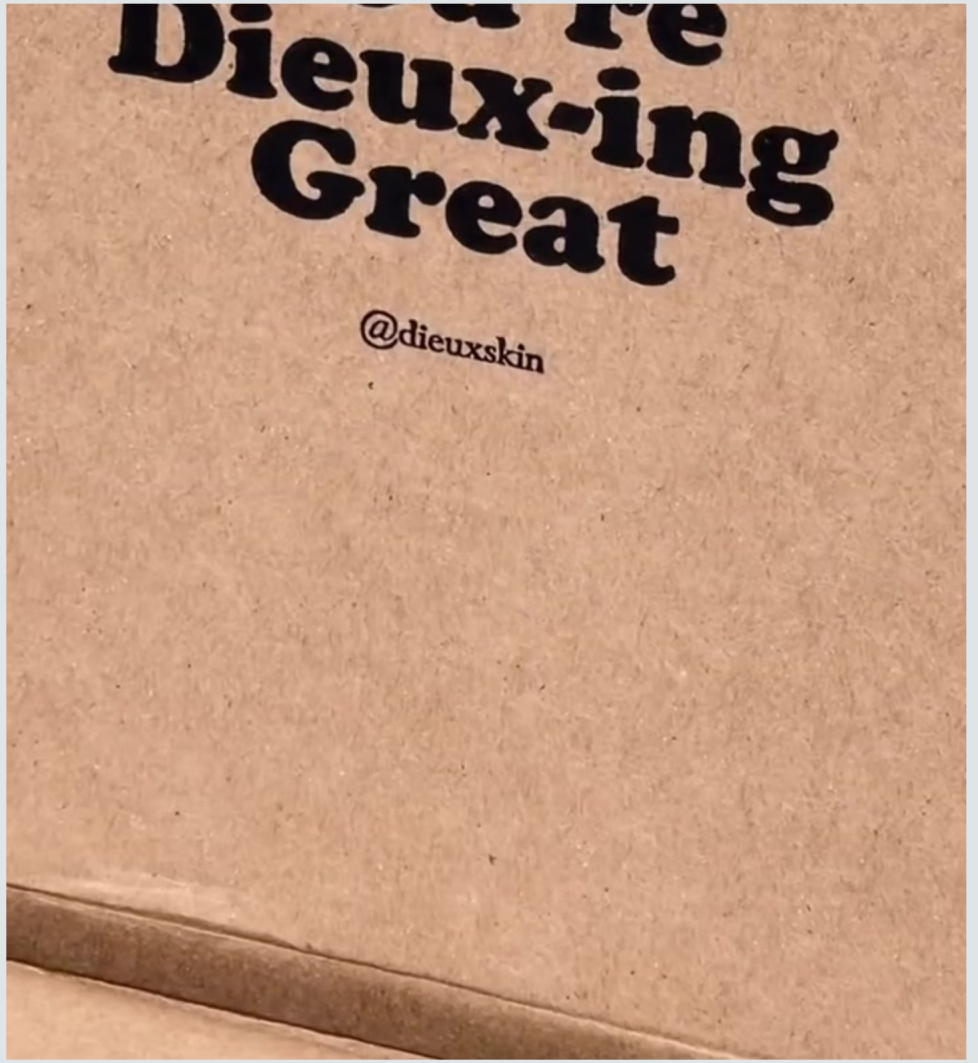

Image: dieuxskin.com · Sources: Glossy, Retail Dive, Business of Fashion

APPENDIX · MARKET TRENDS

Young UK shoppers want reuse and proof

43%	say sustainability is extremely or very important in beauty
73%	say brands don't offer enough refillable products
63%	trust a brand more if a third party verifies its green claims

Price is their biggest barrier, so published costs and carbon data defend against $4 copies.

Source: British Beauty Council × UNiDAYS, 3,533 UK students, Jan 2026 · Image: @dieuxskin

APPENDIX · PERSONAS

Hypothesized early adopters

M

The Conscious Ritualist

MAYA, 27

Owns the Eye Mask, masks 2–3 times a week and feels guilty about sheet-mask waste.

Wants: a reusable face ritual that works with her serums.
Fear: paying $50 for something that falls off.

P

The Ingredient Skeptic

PRIYA, 34

Reads ingredient lists, uses a retinoid and buys fewer, better products.

Wants: proof, not adjectives.
Fear: irritation, breakouts or a gimmick.

J

The Upgrade Gifter

JORDAN, 30

Buys Dieux sets as gifts and loves limited-edition collaborations.

Wants: a beautiful, giftable tin.
Fear: not knowing which size to buy.

Personas built from secondary research; next step is a survey of 500 subscribers and 20 prototype interviews

APPENDIX · DESIGN SPECS

Sizes and materials

NEEDS VALIDATION

Small

~170 × 130 MM

Medium

~185 × 140 MM

Large

~200 × 150 MM

MATERIAL

Platinum-cured, medical-grade silicone, same spec as the Eye Mask

GRIP

0.8–1.0 mm thick with a tacky skin side, so no straps

OPENINGS

Eyes sized for the Eye Mask; open nose and mouth

EMBLEM

Raised halo molded at the forehead; no ink to fade

All dimensions are estimates to be validated with 3D face scans and fit testing

APPENDIX · HOW TO USE IT

A five-step ritual with products you own

1

Cleanse

Start with clean skin

2

Apply

Your own hydrating serum or moisturizer

3

Wait

30–60 seconds, until it feels tacky

4

Press on

Line up the openings, smooth outward; wear 10–20 minutes, ideally lying back

5

Wash and store

Mild soap and water, pat dry, back in the tin

⚠ **Don't mask over** retinoids, AHAs or BHAs, benzoyl peroxide or prescription creams. Skip it on broken or irritated skin.

APPENDIX · PACKAGING

A plain tin, built to be kept

Following Dieux's "boring on purpose" packaging approach: fewer, better materials, as little plastic as possible, and tins people keep.

MATERIAL	100% recycled aluminum tin, about 215 × 165 × 15 mm (estimate)
BRANDING	Oval logo embossed into the lid, never printed
INSERT	Molded-pulp tray shaped to the mask; no plastic liner
SHIPPING	Kraft mailer, recycled board, no plastic wrap
REJECTED	A halo-shaped "viral" case: eye-catching, but more material
TRADE-OFF	Metal is most of the Eye Mask's carbon; recycled aluminum cuts it, not to zero

Image: Dieux launch tin, @dieuxskin · Tin sizes are estimates

APPENDIX · SUSTAINABILITY

How reuse pays back

KNOWN

11

uses for the Eye Mask to match disposables on carbon

KNOWN

37.8 kg

carbon saved a year by a daily user

HYPOTHESIS

15–30

estimated uses for the bigger face mask to break even

TAKE-BACK PROGRAM

Forever, Then Back

Medical silicone can't go in normal recycling. Customers mail back worn masks for specialist downcycling and get $5 toward a replacement.

Source: Bluebird Climate, Forever Eye Mask · 15–30 is an author estimate · Image: @dieuxskin

APPENDIX · PROPOSED LAUNCH PLAN

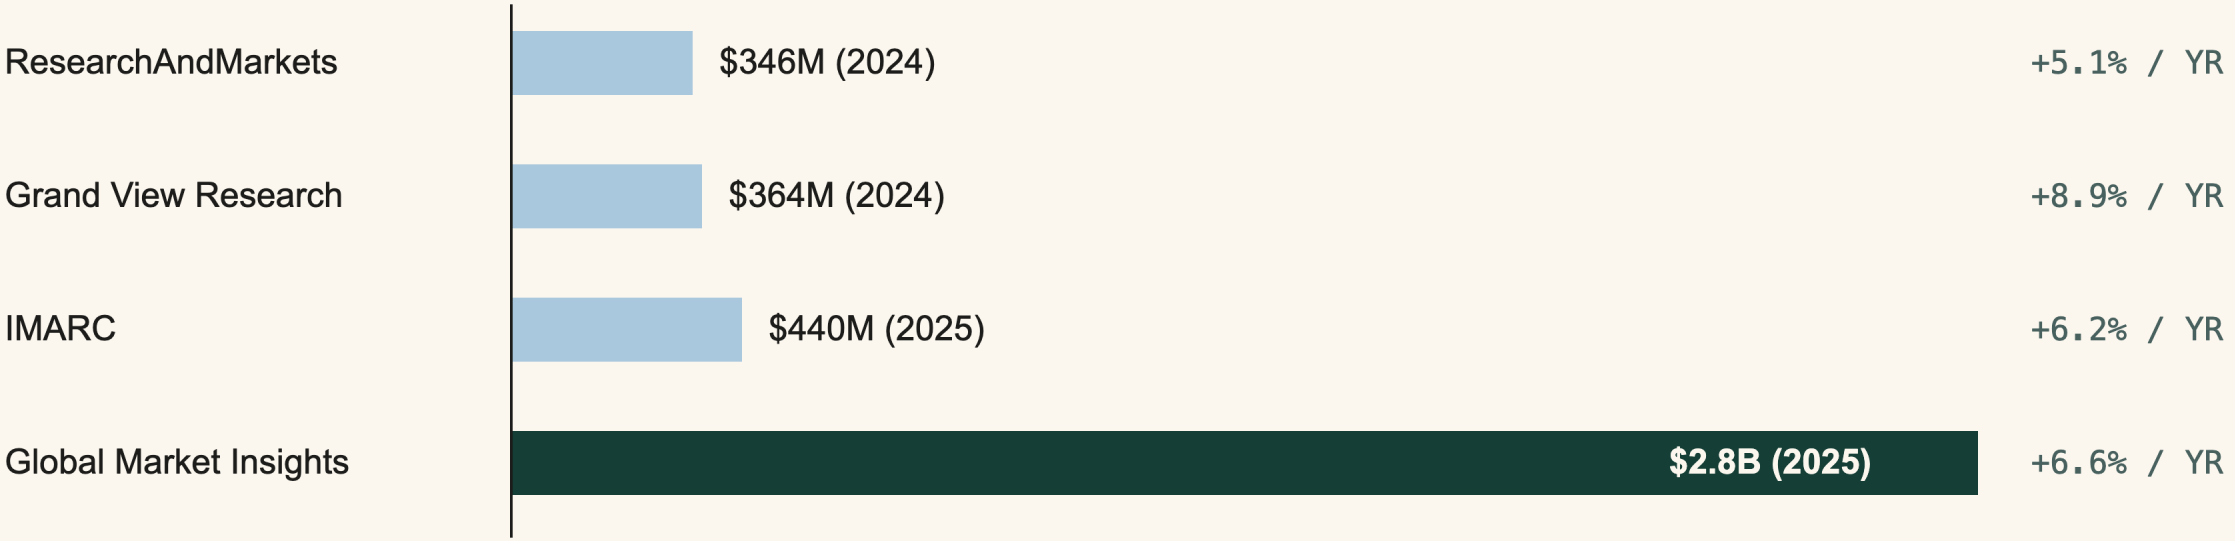

Proposed launch: owners first, then build in public

8 WEEKS OUT	LAUNCH WEEK	PUBLIC	RETAIL	6-9 MONTHS
Build with us	**Owner upgrade**	**Show the receipts**	**Sephora shelf**	**Collaboration**
Founders share prototype fails, tooling costs and why modular lost to one piece. Waitlist opens.	Eye Mask owners get early access and a bundle price.	Cost breakdown posts, fit-template tutorials and a "not over your retinoid" video.	Clear tester with mirror; shelf card with carbon data and cost per use.	Limited artist edition, plus the first take-back report.

Channels: Dieux.com and existing Sephora doors only, in line with the CEO's 2024 statement on distribution.
Creators: skincare educators, estheticians and chemists first.

APPENDIX · MARKET SIZE

Same market, estimates 8x apart

Firms define "sheet mask" differently, but all agree on steady growth. What matters more is the size of the ritual a reusable mask could replace.

Sources: ResearchAndMarkets, Grand View Research, IMARC, Global Market Insights. Global sheet face mask market.

APPENDIX · BRAND MISSION

The mission and four pillars

Industry accountability: ending leaps of faith and guesswork in beauty.

Results Over Miracles

Science-backed routines, no fear-driven marketing or exaggerated claims

Radical Transparency

Publishes the cost of formula, packaging, labor, processing and shipping

Clinical Rigor

Clinically vetted, globally compliant ingredients, not buzzwords

Conscious Consumption

Buy less, use multi-functional products, protect the skin barrier

Source: Dieux about page and brand materials

APPENDIX · PACKAGING PHILOSOPHY

"Boring" on purpose

In its own Instagram video, Dieux contrasts eye-catching "viral" packaging with its own approach:

- Fewer, better materials
- Packaging chosen for function, price and lifecycle
- As little plastic as possible
- 100% recycled aluminum wherever possible
- Launch tins people keep and reuse

Source: @dieuxskin Instagram video on packaging (paraphrased); image is a frame from it

APPENDIX · BRAND FIT

How each pillar shaped the design

Ending guesswork

Three sizes and a printable fit template; publish who the fit study didn't fit

Results Over Miracles

Hydration claims only; no lift, sculpt or wrinkle language; 10–20 minute wear

Radical Transparency

Published cost breakdown, including molds; admit silicone isn't curbside recyclable

Clinical Rigor

Safety tests on finished masks; split-face hydration study before any claim

Conscious Consumption

One mask, not a set of parts; works with what you own; take-back program
